

Capittance vs Microsoft Project.

MS Project is a general-purpose planning tool.

Capittance is a purpose-built delivery operating system
for SAP S/4HANA and Microsoft Dynamics 365 programmes.

15 rows below explain why £100M+ programmes move.

The 15 rows CIOs actually ask about.

CAPABILITY	MICROSOFT Project	CAPITTANCE Harmonizer
Core design	✗ General-purpose task, schedule & resource planning.	✓ Purpose-built delivery OS for SAP S/4HANA & Dynamics 365 transformations.
SAP Activate alignment	✗ None — generic WBS / Gantt structure.	✓ Native 134-step SAP Activate methodology built into governance & tracking.
Live ERP tenant connectors	✗ No S/4HANA or D365 data connection.	✓ Live OData/OAuth connectors to S/4HANA and D365 (Finance, Sales, SCM, CX).
Delivery-domain coverage	✗ Tasks, timeline, resources, basic budget.	✓ 10 domains: Governance · Fit-to-Standard · Data · Integration · Testing · OCM · Cutover · Value · IP · AI.
Executive reporting	✗ Manual export; board decks built by hand from Project data.	✓ One-click 20-slide Board Pack generated from live KPIs, RAID and budget in 60 seconds.
AI assistance	✗ Copilot for Project — generic scheduling help.	✓ NAVBOT (Claude 4.5) trained on your programme's RAID, milestones, KPIs — board-level answers in plain English.
Diagnostics engine	✗ None — user interprets Gantt / BCWS / EAC.	✓ Automatic RAG signals: schedule slippage, budget overrun, critical-path delay, risk exposure — with AI-drafted remediation.
RAID + schedule linkage	✗ Not native. Excel add-in or SharePoint list.	✓ Full RAID log linked to schedule items — risk chips surface on the Gantt itself.

The 15 rows CIOs actually ask about.

CAPABILITY	MICROSOFT Project	CAPITTANCE Harmonizer
Value Realization	✗ None — separate spreadsheet exercise.	✓ Planned-vs-Achieved tracker with benefit-owner attribution across CFO/COO/CRO/CIO.
Baseline + FS/SS/FF/SF deps PARITY · BOTH SHIP	✓ Multi-baseline + FS/SS/FF/SF dependencies.	✓ Baseline with variance chips + FS/SS/FF/SF + lag/lead cascade. Full parity.
Multi-tenant workspace	✗ .mpp files on desktop + SharePoint gymnastics.	✓ Native multi-tenant SaaS. Every org gets its own private workspace; DB-layer isolation.
Learning curve to board-ready	✗ 100+ hours to master ribbon, PERT, resource levelling.	✓ Board-ready in under 30 minutes. No ribbon.
Update / deployment cadence	✗ Version-locked desktop app; annual releases.	✓ Continuous SaaS. New capabilities land the moment they ship.
Pricing (per user / month)	✗ Project Plan 5 · \$55/user + Server/Portfolio add-ons.	✓ Basic \$200/mo flat · Platinum \$350/mo flat · 14-day pilot at \$0.
12-mo TCO · 8-person team	✗ ≈ \$18-25K (licences + PowerBI + SharePoint + 120 hrs deck labour).	✓ ≈ \$2.4-4.2K subscription. Board decks in-app. ≈ 80-85% TCO reduction.

Three voices. One conclusion.

“

The Board Pack replaced three PowerBI dashboards and a Monday-morning fire drill. We haven't opened Project since.

— CFO · £2B UK RETAILER

“

NAVBOT told me our S/4HANA cutover was 12 days off baseline before my delivery lead did. That's the whole product.

— CIO · ASX-LISTED MANUFACTURER

“

MS Project got us to detail. Capittance gets us to decisions. Both matter, but only one saves us from Sunday-night decks.

— PROGRAMME DIRECTOR · EU INSURER
